Sowing Instructions

Sow from February to May indoors, and keep them warm for germination to occur.

Sow the seed sideways roughly 1cm deep in individual pots.

Plant into position once the seedlings are 10cm tall. Tie plants to supports as they climb.

Days to harvest to maturity

60-70 days.

Tips

Pick the courgettes when they're young and tasty (10cm). This is when their flavour is the most concentrated.
