Sowing Instructions

Sow in a location that gets plenty of sun or sits in partial shade.

Once all danger of frost has passed, Basil can be planted outside from early-spring through mid-summer. Keep soil moist during germination.

Once they've reached about 3-5cm, thin to around 15-20cm apart. Take cuttings of the leaves regularly to encourage new growth.

Days to harvest to maturity

60 days.

Tips

Pick regularly for a continuous supply of leaves throughout their season.
