

Lettuce Crisphead – Iceberg

Latin Name

Lactuca sativa

Pack Size

Approx. 4000
 Seeds

Everyone knows Iceberg lettuce! And now, with our Lettuce Crisphead Iceberg seeds, you can grow them at home with ease. Produces medium to large lettuce heads that are full of crispy leaves. Can appear in shades of green to bronze. More ideal for a colder season, as they can bolt in warmer weather.

Sowing Instructions

Lettuce is hardy, allowing you to plant them as soon as the ground is pliable.

Can be sown directly outside at a depth of 1/8 inch, and firm soil gently. When seedlings are 3-4cm, thin by 5cm apart.

Will take 7-14 days to germinate. Plant in a sunny location that is out of the shade.

Days to harvest to maturity

75 days.

Tips

Harvest with scissors 1 inch above the soil when plants are 4 to 6 inches high or pick leaves from the outside. Varieties will grow back.
