

Tomato – Sungold

Latin Name

Solanum lycopersicum L.

Pack Size

Approx. 8 Seeds

Tomato Sungold is a half-hardy variety that produces small rounded vine-grown tomatoes. They start life as a dark green, but as they mature, they'll turn a golden orange shade. Has a high sugar content, and produces an abundance of fruits. A winner of the RHS Award of Garden Merit.

Sowing Instructions

Sow in early to mid spring 1cm deep. Germination often takes around 6-14 days at when conditions are warm.

Transplant the seedlings when large enough to handle into 5cm pots. Plant on in the greenhouse or gradually acclimatise them to outdoor conditions.

When they're ready to go outside, ensure the soil is fertile, well-drained, and kept moist.

Days to harvest to maturity

65 days.

Tips

Has a good resistance to Tobacco Mosaic Virus.
