Sowing Instructions

Sow in early to mid spring 1cm deep. Germination often takes around 6-14 days at when conditions are warm.

Transplant the seedlings when large enough to handle into 5cm pots. Plant on in the greenhouse or gradually acclimatise them to outdoor conditions.

When they're ready to go outside, ensure the soil is fertile, well-drained, and kept moist.

Days to harvest to maturity

75 days.

Tips

Keep well-watered throughout their season, making sure the plant doesn't dry out.
